

Get Reviews lets you create widget or QR code for your website which enables users to review your business on the most popular platforms.

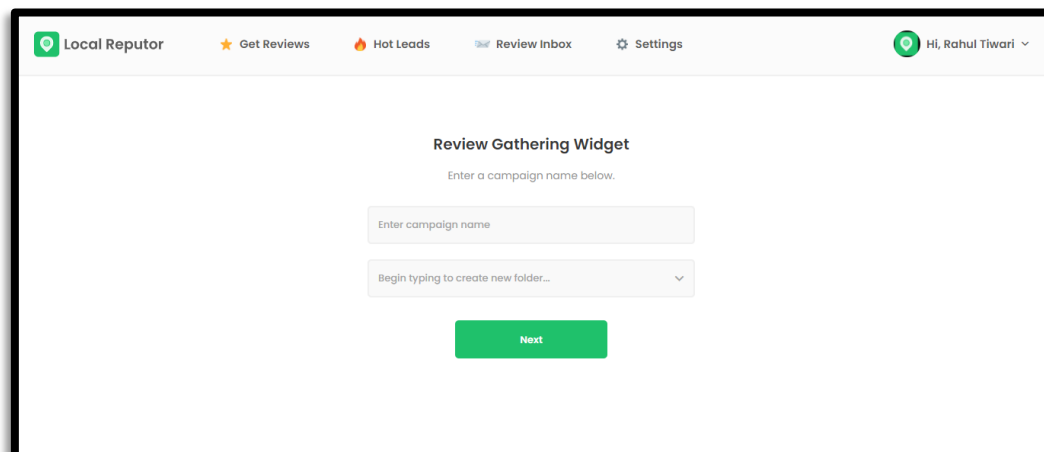

How to create Website Widget

Follow these simple steps below:

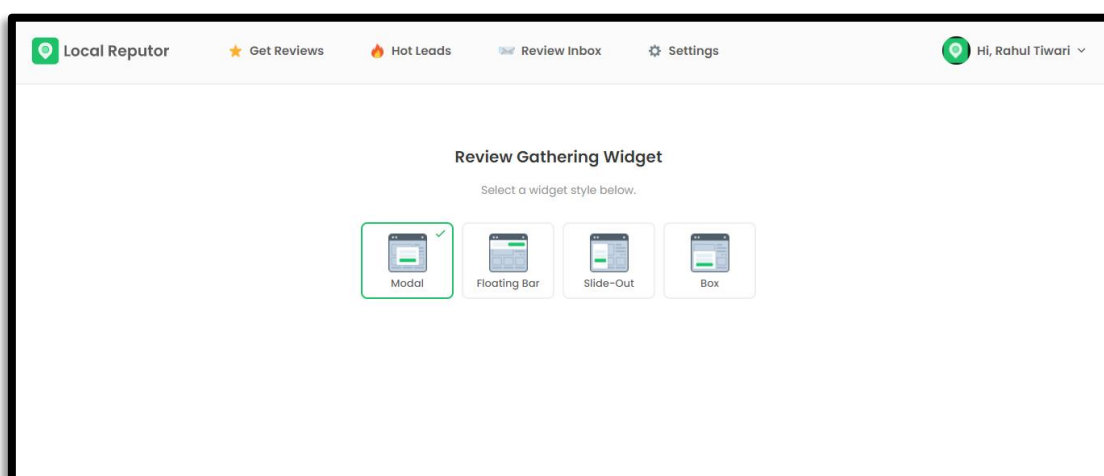

1. On the Local Reputor dashboard, click on **Get Reviews**. Two options will be visible i.e Website Widget and QR Code Generator. Click on Website Widget.

2. It'll ask you for a Campaign name and Folder name. Here folder feature lets you organize your widgets, if multiple are being created.

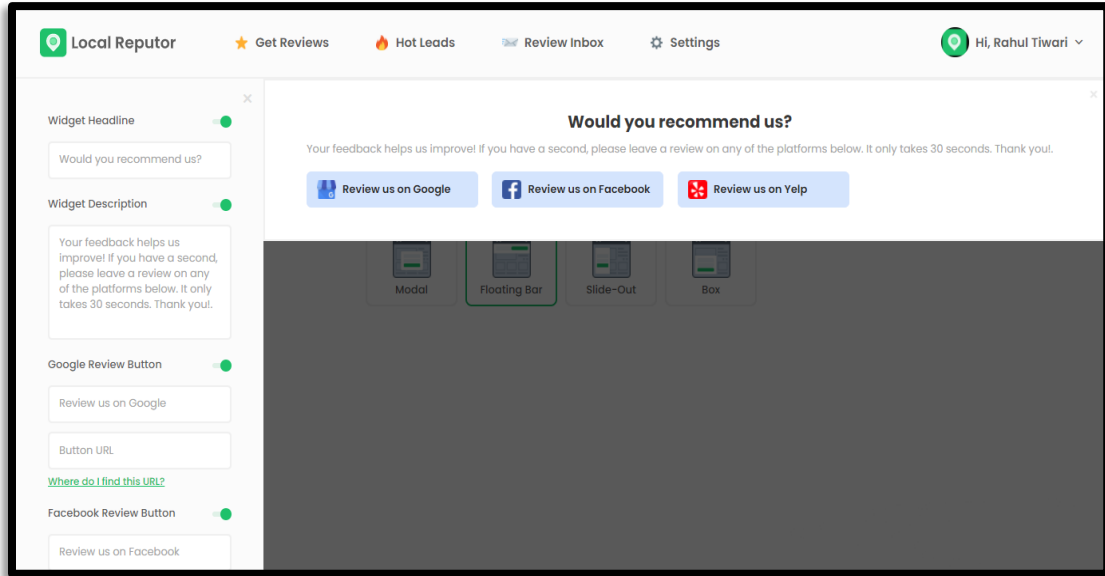

3. After you've entered the details it'll ask for the widget style. There are 4 widget styles available.

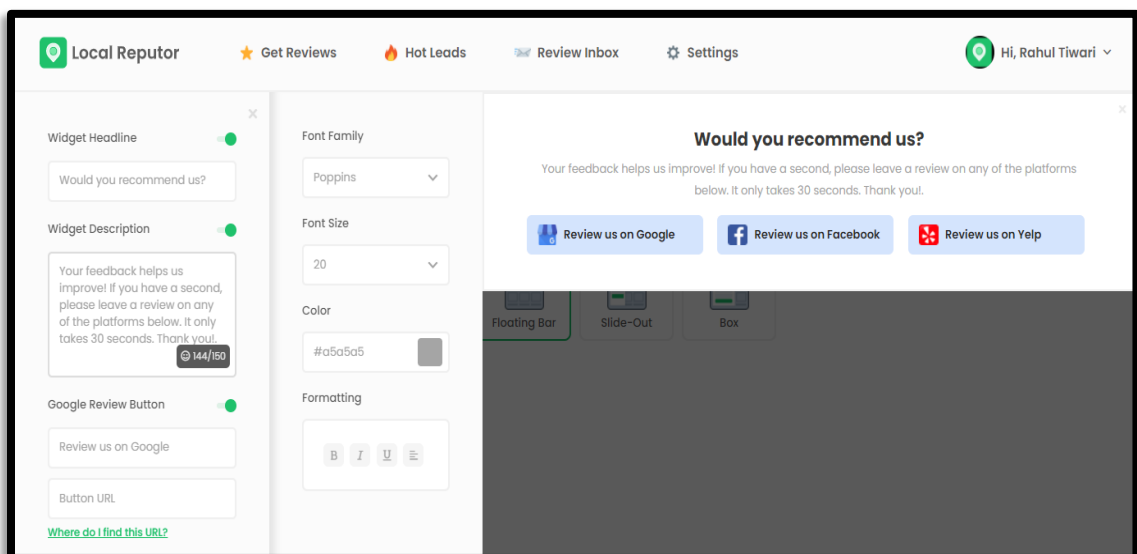

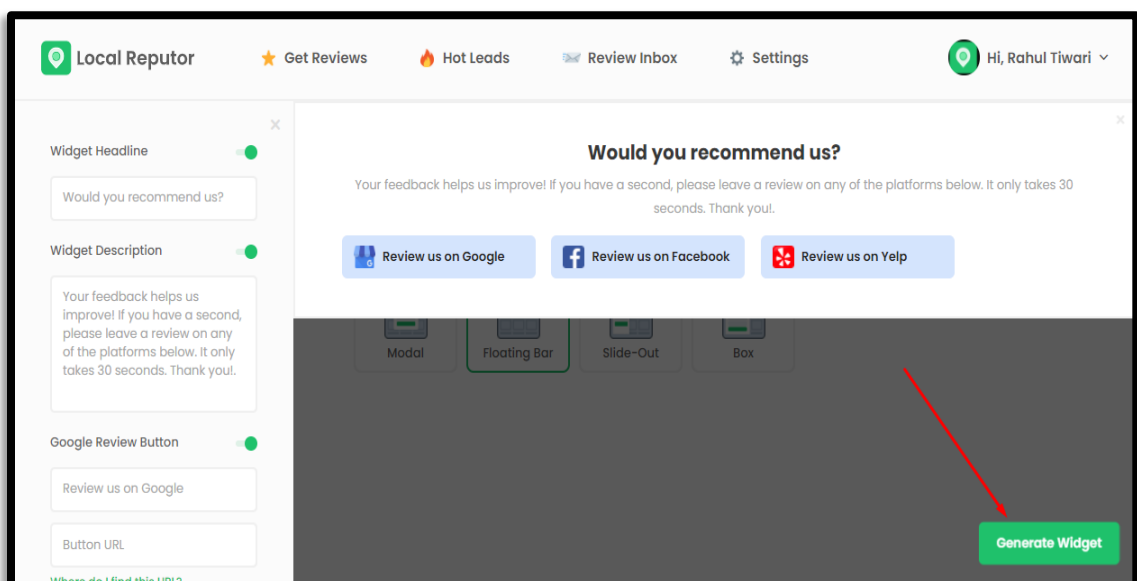

- Once you've chosen the widget style, you'll be greeted with the widget editing window. Here you can make changes to the widget text such as the Widget Headline, Widget Description and so on.

- You can change the Fonts, its size and color by clicking on the respective text field.

- Once all necessary customizations are done, click on the **Generate Widget** button located on the bottom right part of the screen.

7. The next screen will let you copy the widget code. You can copy the code directly and paste it into your website which will enable the widget on your website.

A screenshot of the Local Reputor web application interface. The top navigation bar includes the 'Local Reputor' logo, menu items for 'Get Reviews', 'Hot Leads', 'Review Inbox', and 'Settings', and a user profile 'Hi, Rahul Tiwari'. The main content area is titled 'Review Gathering Widget' and contains instructions: 'Place the script above the closing </body> tag on the page where you want the widget to be displayed.' Below this is a code block with a 'Copy code' button. The code is:

```
<script src="https://app.localreputor.io/frontend/widget.js" id="127" id="1r_script_widget"></script>
```

 At the bottom of the main area are two buttons: 'Publish' (green) and 'Create New Widget' (light green).

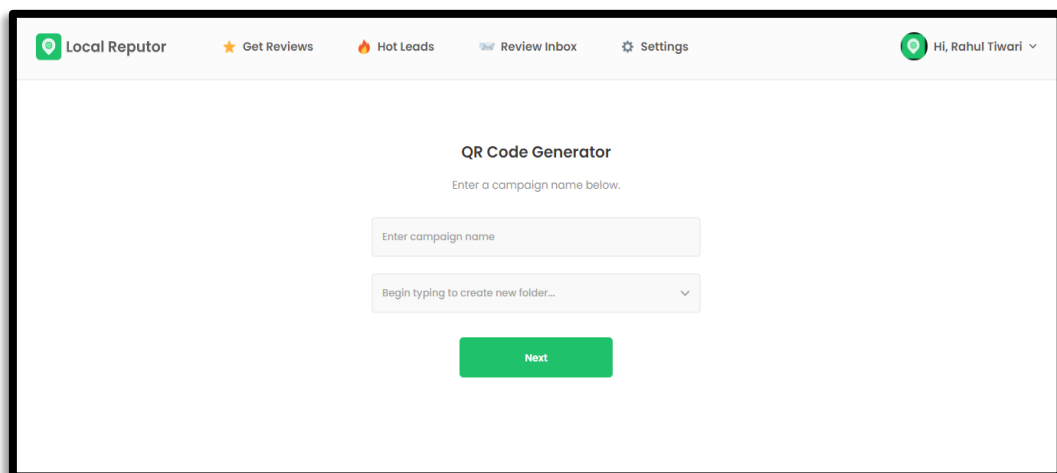

How to Generate QR Code

Follow these simple steps below:

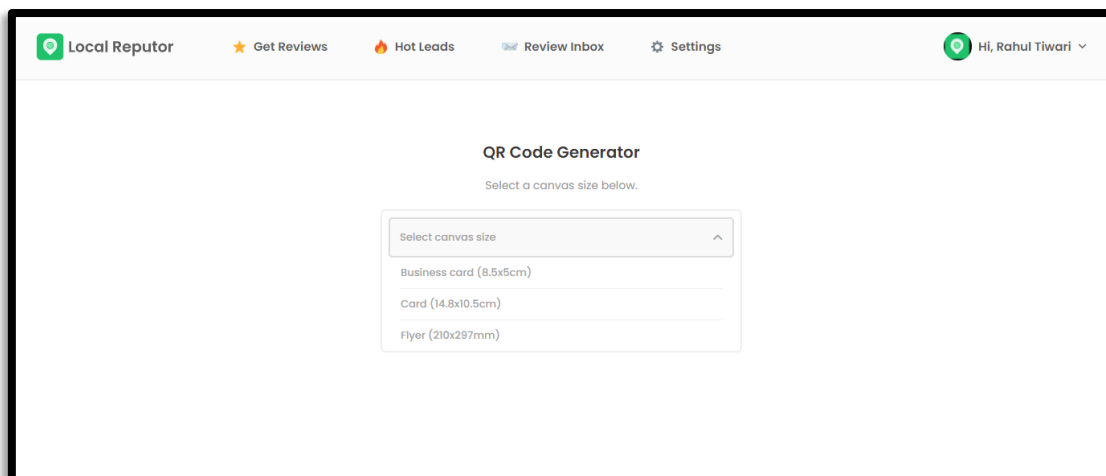

1. On the Local Reputor dashboard, click on **Get Reviews**. Two options will be visible i.e Website Widget and QR Code Generator. Click on QR Code Generator.

2. It'll ask you for a Campaign name and Folder name. Here folder feature lets you organize your QR Codes, if multiple are being created.

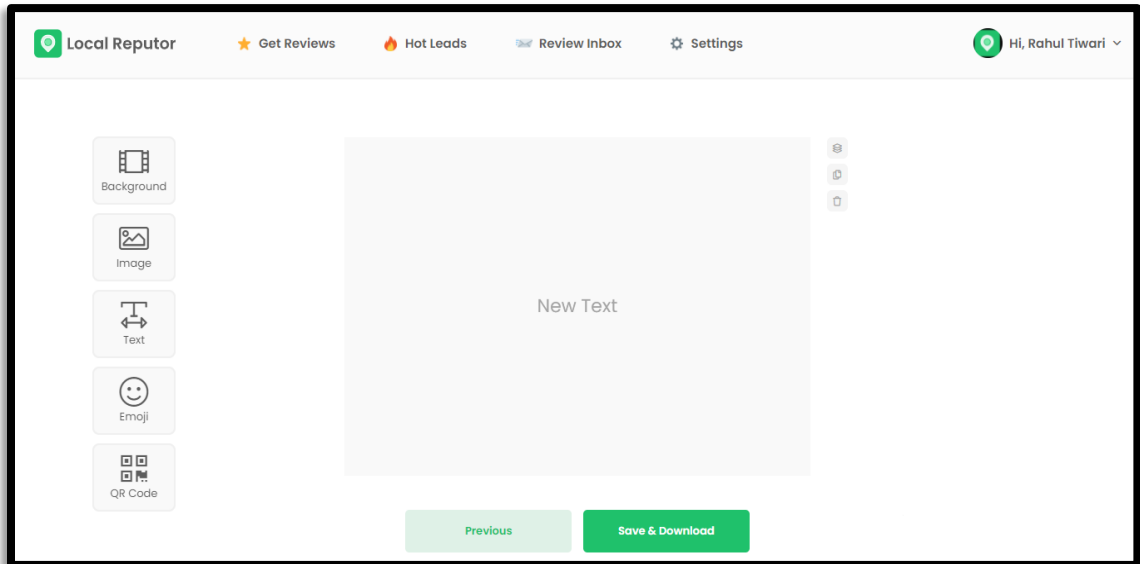

3. After you've entered the details it'll ask for the Canvas size. There are 3 canvas sizes available.

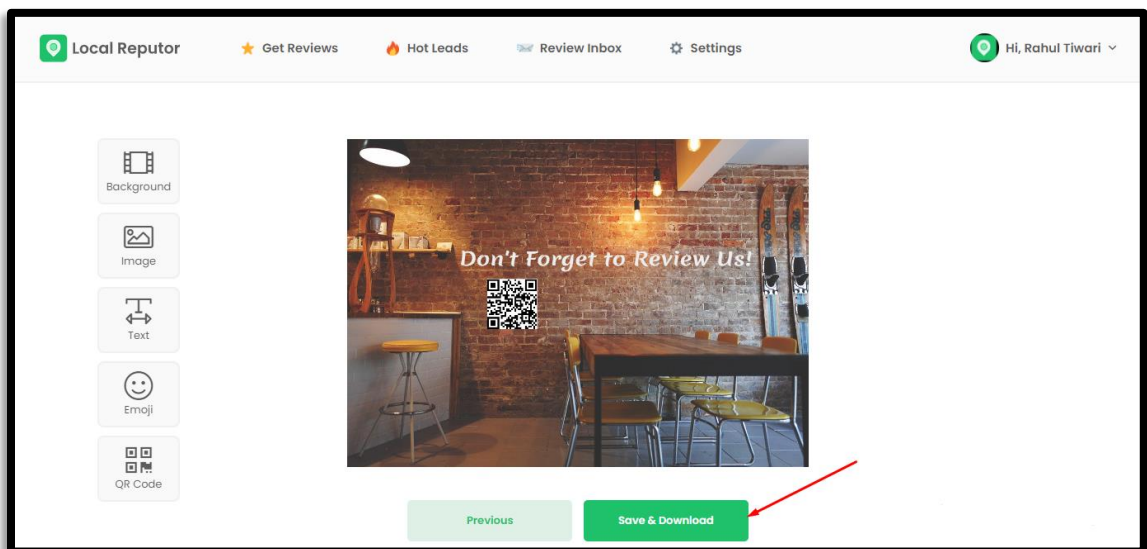

- Once you've chosen the canvas size, you'll be greeted with the canvas editing window. Here you can make changes to the canvas such as adding a Background, Text, Emoji and so on.

- Once all necessary customizations are done, click on the **Save & Download** button located on the bottom center part of the screen.

- After clicking on Save & Download button it'll download an image file on your computer.
