

## RUSH TUTORIAL- How to create Quote Videos

Follow these simple steps below:

1. On the Rush dashboard, scroll down to the bottom and click on **Quote Videos**.

2. To upload a photo of your preference, click on the Upload option, the **“Upload”** option, choose your image then click **“Open Upload Library Files”** and select the photo you just uploaded. If you want the default photo on the slide, then no need to change it.

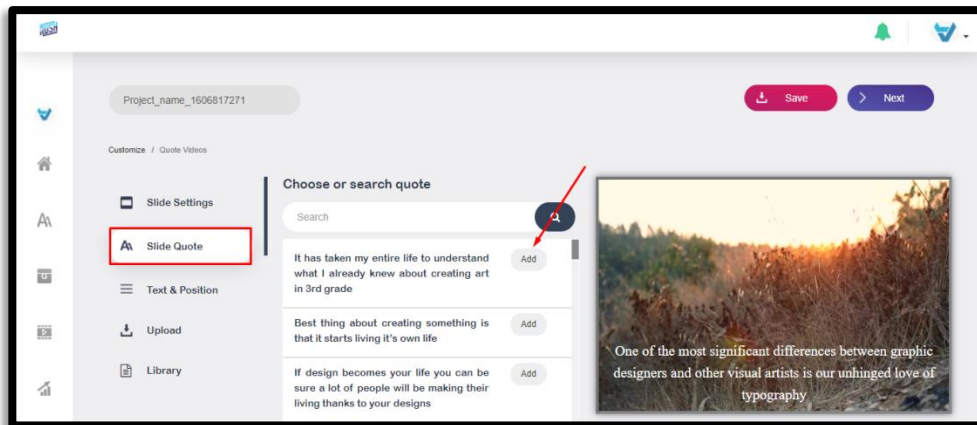

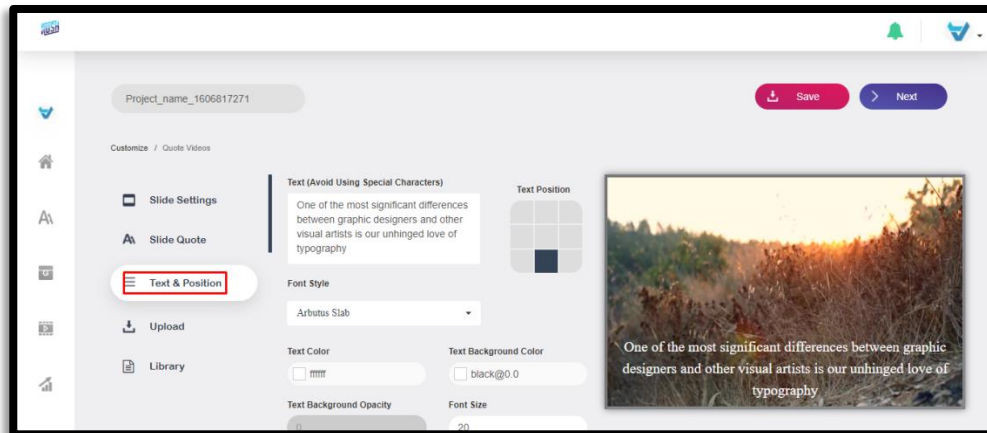

- To set the duration of the slide, click on **Slide Settings** then adjust it on the **Slide time** option.

- To change the quote, click on **Slide Quote**. Here you can search a famous quote, or you can enter your own.

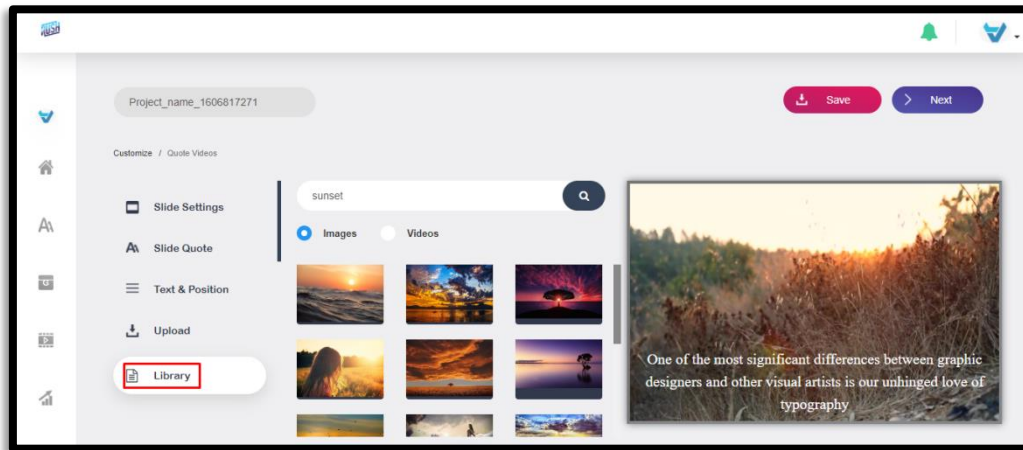

- To change the text position, font style, color and size as well other font properties, click on the **Text & Position** tab.

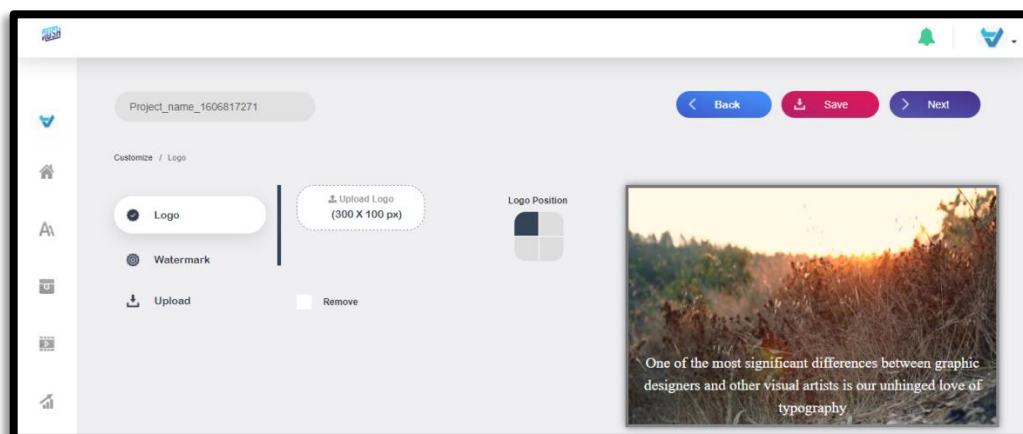

- To explore the pre-uploaded images and videos you might want to use on your slide, click on **Library**.

- If you're done customizing your slide, click on the Save button on the upper right corner. A small pop-up on the bottom right side part of the screen will appear saying that you have successfully saved the campaign.

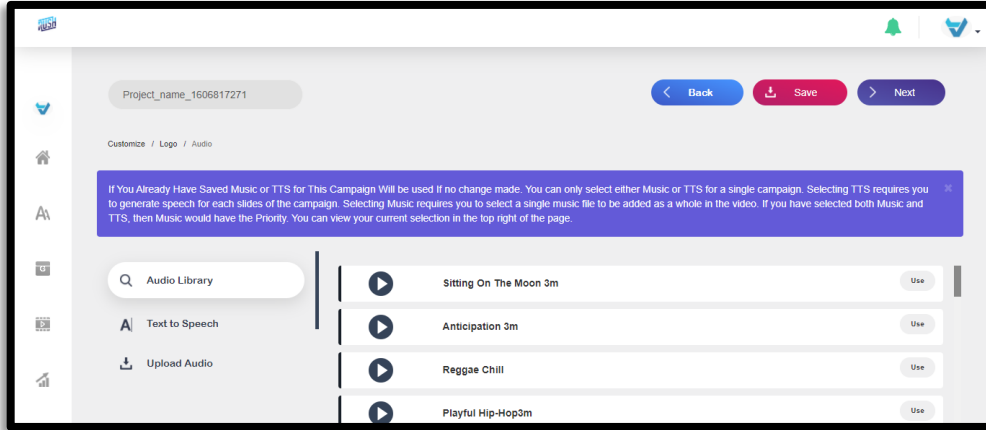

- After which click the **Next** button which is located next to the Save button. You will then be directed to a page where you can personalize your slide by inserting a logo or watermark and change its position. To upload your company's logo, click on **Upload**.

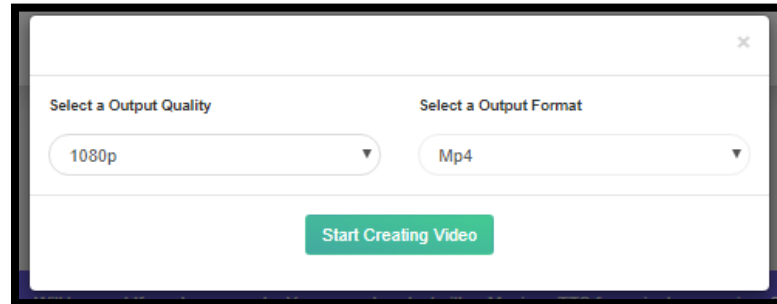

- Once done, click on **Next** again. You will be directed to a window wherein you can insert music on a slide. You can use your own by uploading it or you can use the pre-uploaded ones.

It also has a **Text-to-Speech** feature where you can enter a text and AI will read it out loud while you play your video. You can select the language as well as the tone of voice.

- Hit **Next** then choose your preferred output format of the video. Once done, click on **Start Creating Video**.

- Your video has now been saved you will be directed back to the dashboard. You can check your saved videos if you scroll down to the **Campaign Data** on the bottom part
