

### VIDEOTIK TUTORIAL- How to Create a GIF Video

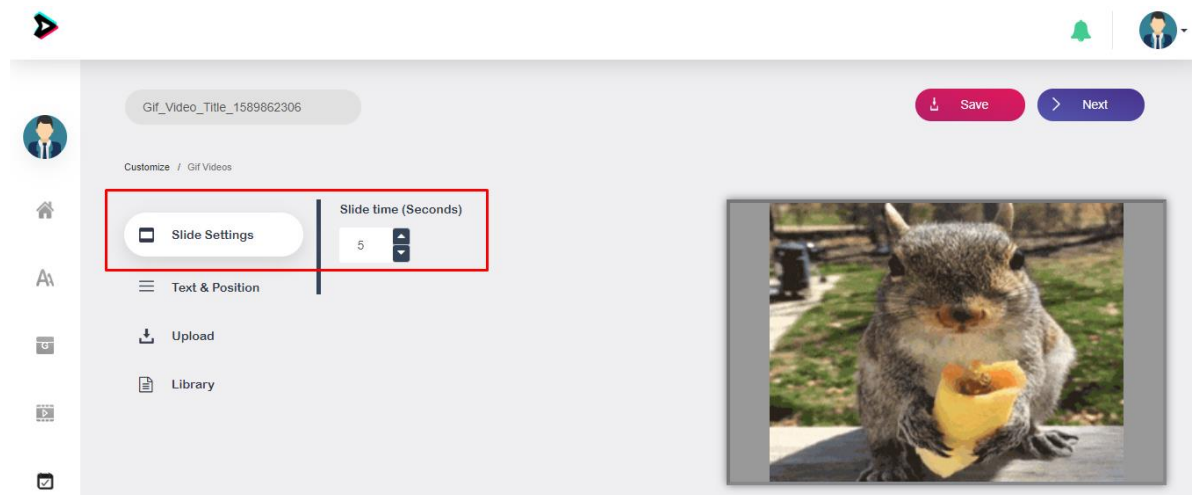

GIF commonly refers to a short, animated picture without sound. You can customize it according to your preference and upload it to your site later on. Please note GIFs will not be available in TrimReel and TTPublisher dashboard.

Follow these simple steps below:

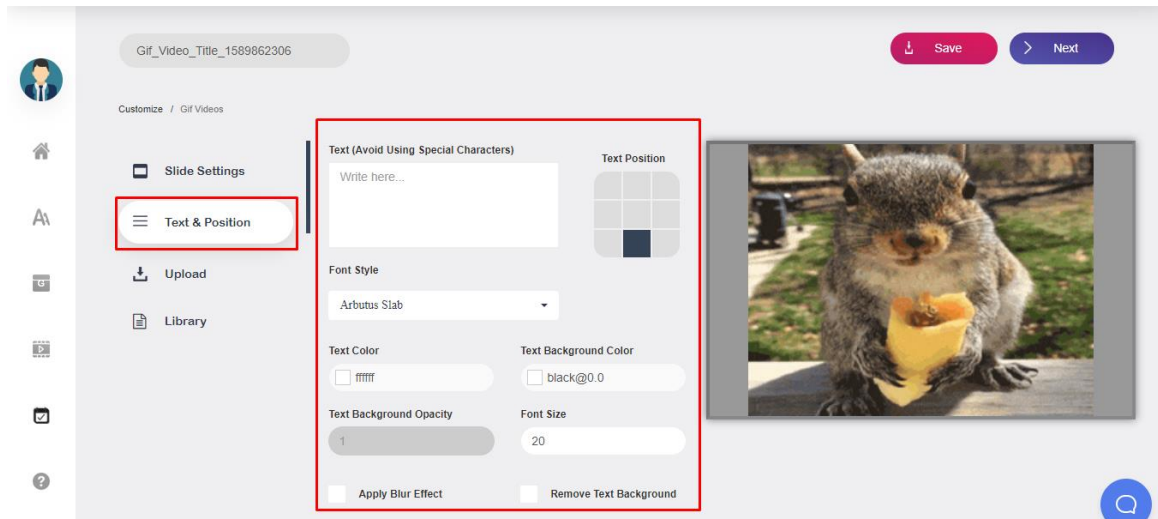

1. On the dashboard, scroll down to the bottom and click on GIF Videos. Here you can search for a niche/keyword then enter a number if slides.

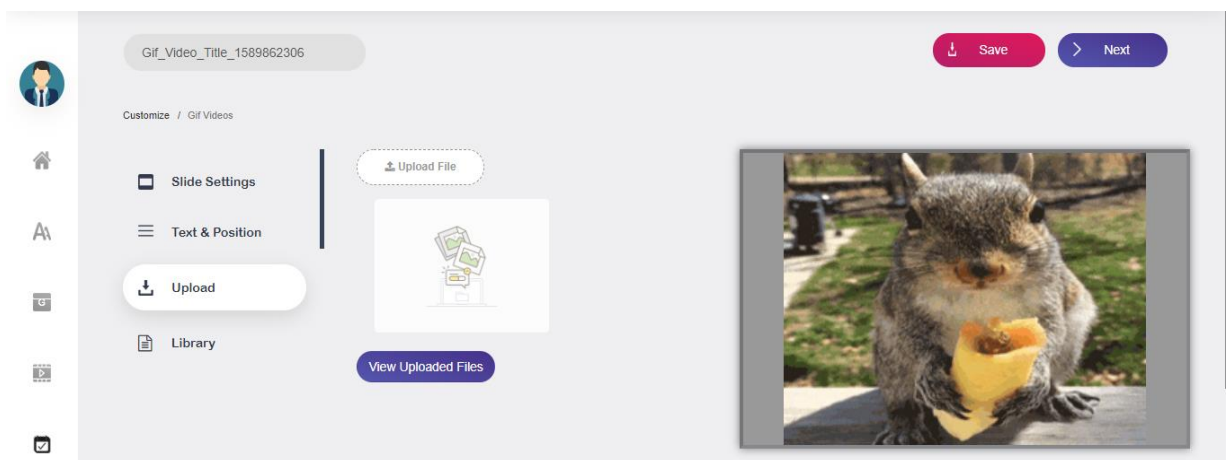

2. On the next window, you will get to adjust the slide duration.

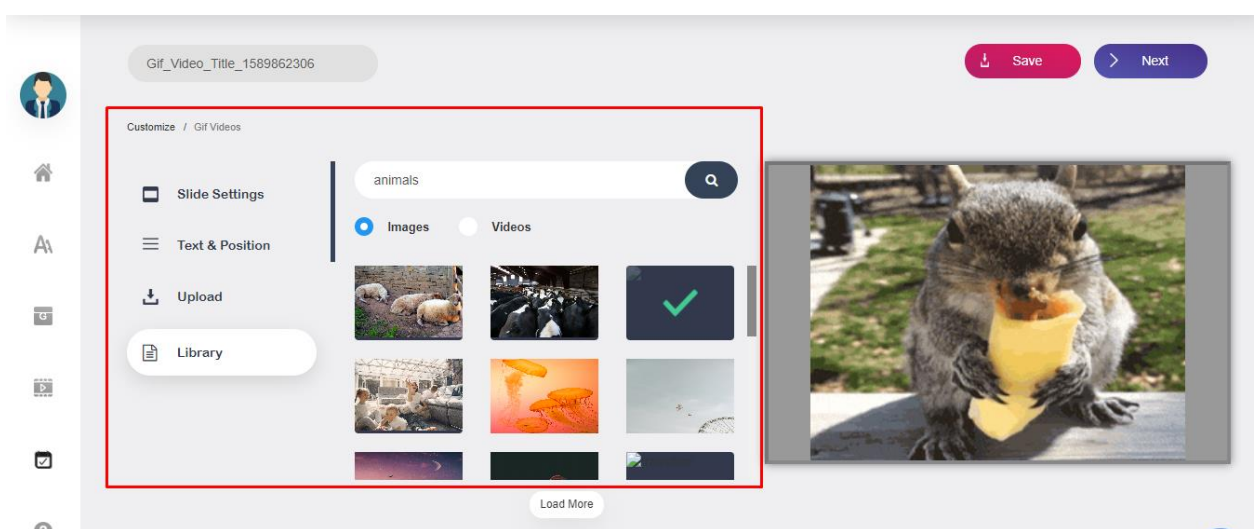

4. Text and Position- you can change the text properties such as the font style, text color, text background color, etc. **Please avoid using special characters.**

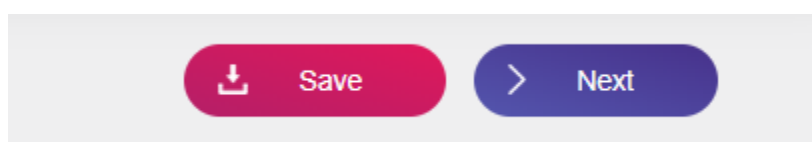

5. On the Upload tab, you can change the image or upload a photo of your own. Just click on the upload button then Open Upload Library Files.

5. On the Library tab, you can select pre-uploaded videos and images you can use on your video. Just search by typing your niche keyword.

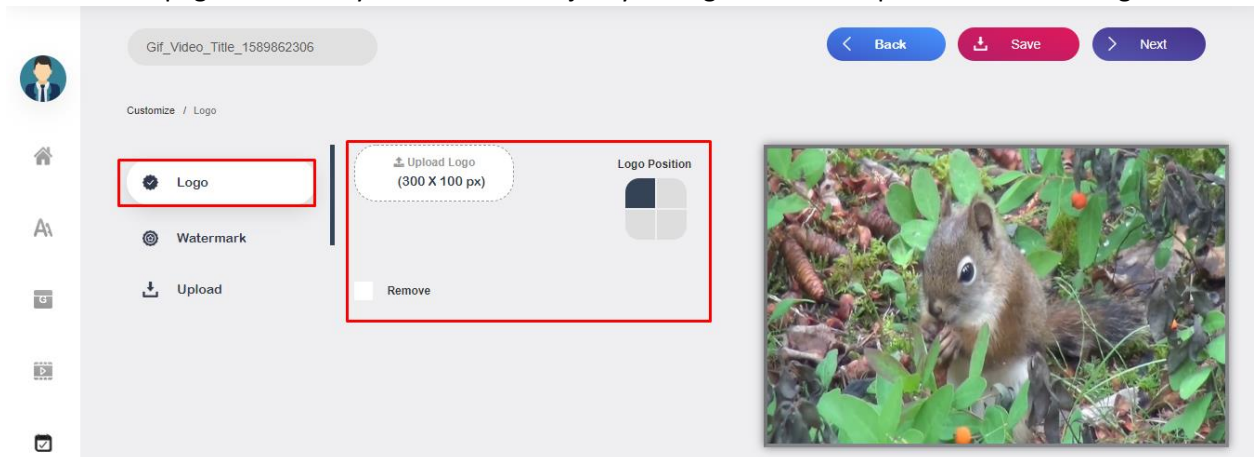

7. Once all necessary customizations are done, click on the **Save** button located on the upper right part of the screen. After that, click on **Next**.

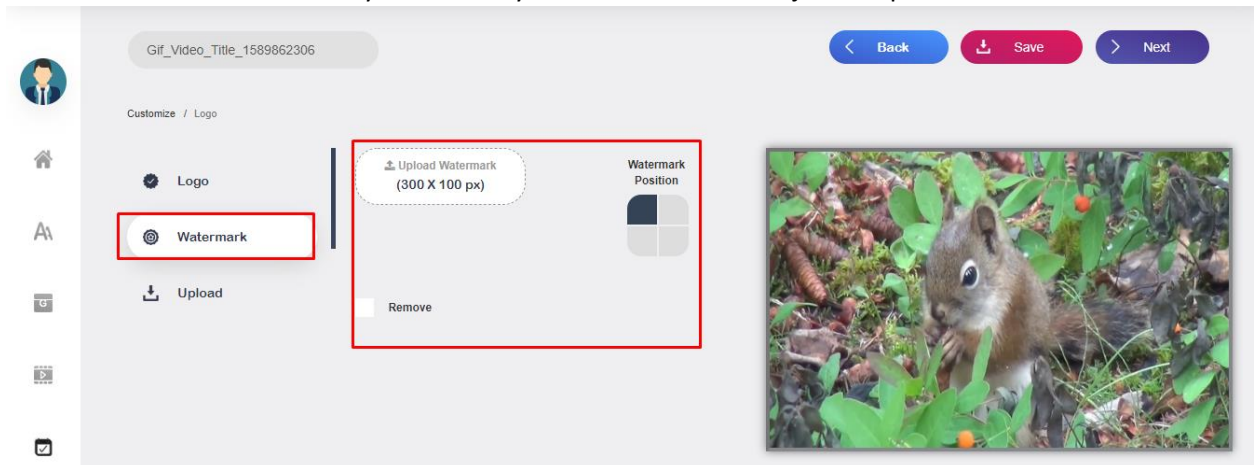

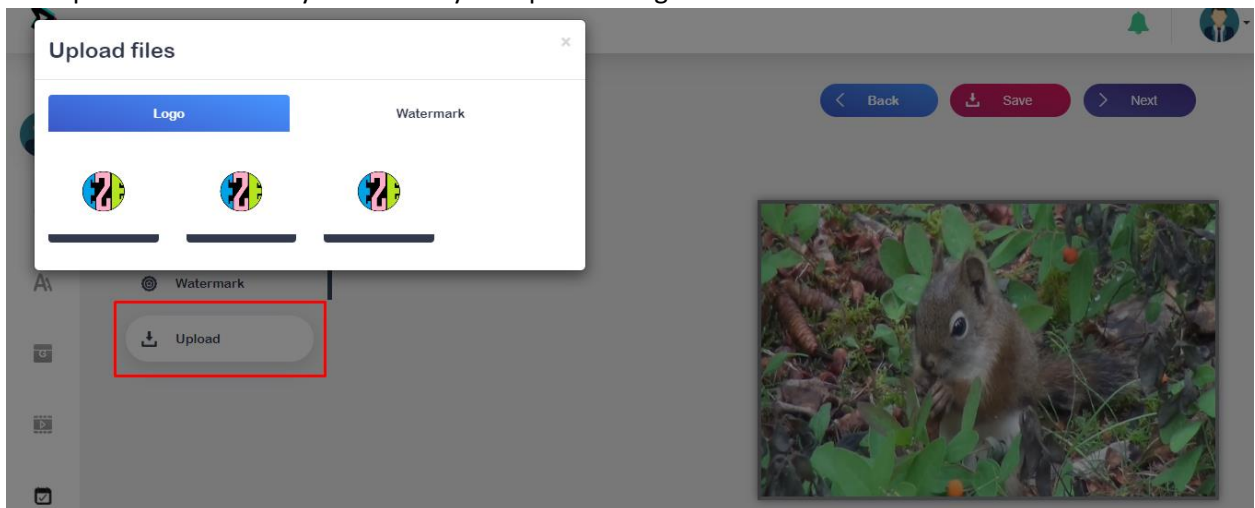

8. The next page will be for you to add and adjust your logo. This is an optional feature though.

9. Watermark- this is where you can add your watermark and adjust the position as well.

10. Upload tab is where you can find your uploaded logo and watermark.

11. Once you are done, click Next and you will be directed to a page where you can add music or text to speech. You should skip this step as GIFs won't render music in it. And go ahead with rendering as GIF

If You Already Have Saved Music or TTS for This Campaign Will be used If no change made. You can only select either Music or TTS for a single campaign. Selecting TTS requires you to generate speech for each slides of the campaign. Selecting Music requires you to select a single music file to be added as a whole in the video. If you have selected both Music and TTS, then Music would have the Priority. You can view your current selection in the top right of the page.

Audio Library

Text to Speech

Upload Audio

- Sitting On The Moon 3m Use
- Anticipation 3m Use
- Reggae Chill Use
- Playful Hip-Hop3m Use

12. Click Next once you're done, then choose an output quality and format. Click Start Creating Video.
