

VIDEOTIK TUTORIAL- How to Add a Virtual Account

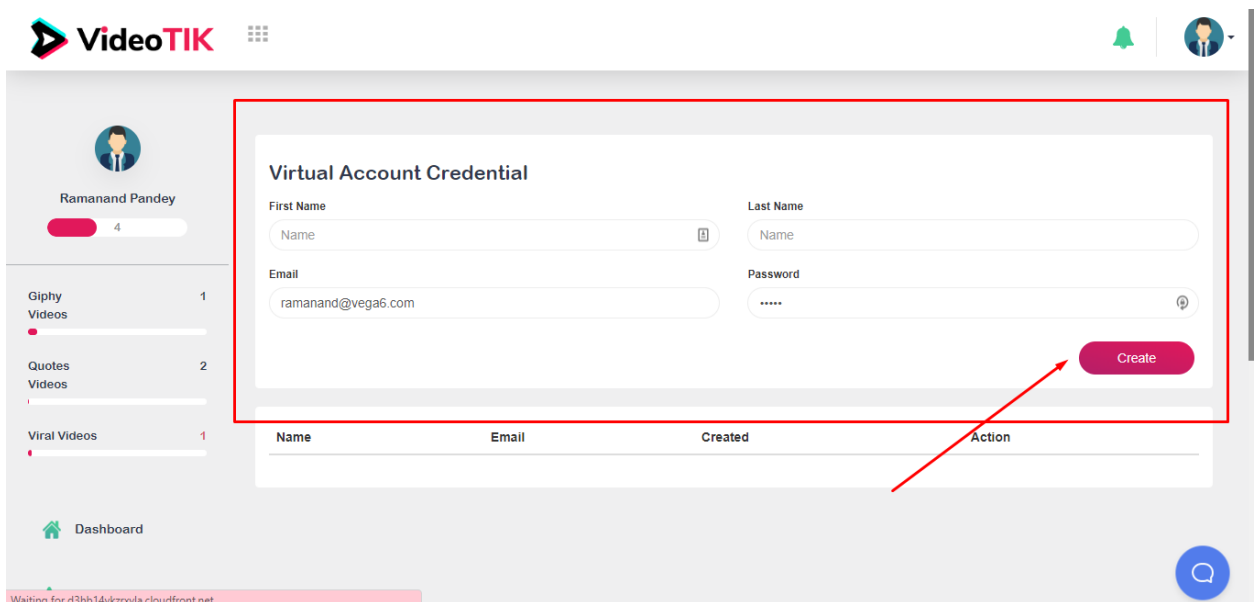

Virtual accounts are for team member or partner. They will have access to everything on your VideoTik account including administrative privileges and changing the client and virtual account information.

Follow these simple steps below:

1. On the dashboard, go to User menu dropdown on the upper right side then click on Client Account.

2. Fill out the necessary information for you client then click Create.

3. Once done, there will be a pop-up on the lower right side saying "User added successfully". You can see the added user account on the table below the Virtual Account Credential and just click on the X button if you wish to delete it.
